Premium timber coated in Polymer (PVC)

Discover the Cornerstone Hybrid Shutter, where elegance meets innovation. Our shutters blend premium timber with a durable Polymer (PVC) coating, creating a lightweight, stable, and stylish solution for any window. Designed for ease and durability, they feature advanced joinery for unmatched strength and a unique latch system for seamless operation. With a palette of 11 contemporary colours and a range of configurations and tilt options, these shutters are custom made to fit your design vision. Environmentally conscious and offering superior insulation, they come with a 15-year warranty, making them a smart choice for your home.

- ✓ **Lighter weight, easier operation:** Enjoy effortless control thanks to the innovative hybrid construction that's lighter than traditional shutters.
- ✓ **Superior stability, wider panels:** Experience exceptional stability with wider panels (up to 1000mm*) due to the robust timber core.
- ✓ **Durable finish, built to last:** The super tough polymer coating withstands everyday wear and tear, perfect for busy households.
- ✓ **Strength and precision:** Mortise and tenon joinery ensures perfect squareness and long-lasting durability.
- ✓ **Secure closure, no magnets:** Unique button latches guarantee easy and secure closure, eliminating the need for unsightly magnets.
- ✓ **Tailored solutions:** Hinged, sliding, bi-fold, and shaped shutters cater to any window or door.
- ✓ **Control your way:** Multiple tilt rod options, including geared, hidden, center, and side tilt, offer personalised comfort.
- ✓ **Eco-conscious choice:** Environmentally friendly with sustainable timber, water-based paints, and strict safety standards.
- ✓ **Enhanced insulation:** Polymer-coated timber provides superior insulation compared to standard PVC shutters, keeping your home comfortable year-round.

*Larger panels may need to be lifted into the closed position.
